

You can't ask AI to “go make money.”

So we strengthen the way you already earn.

Service Overview

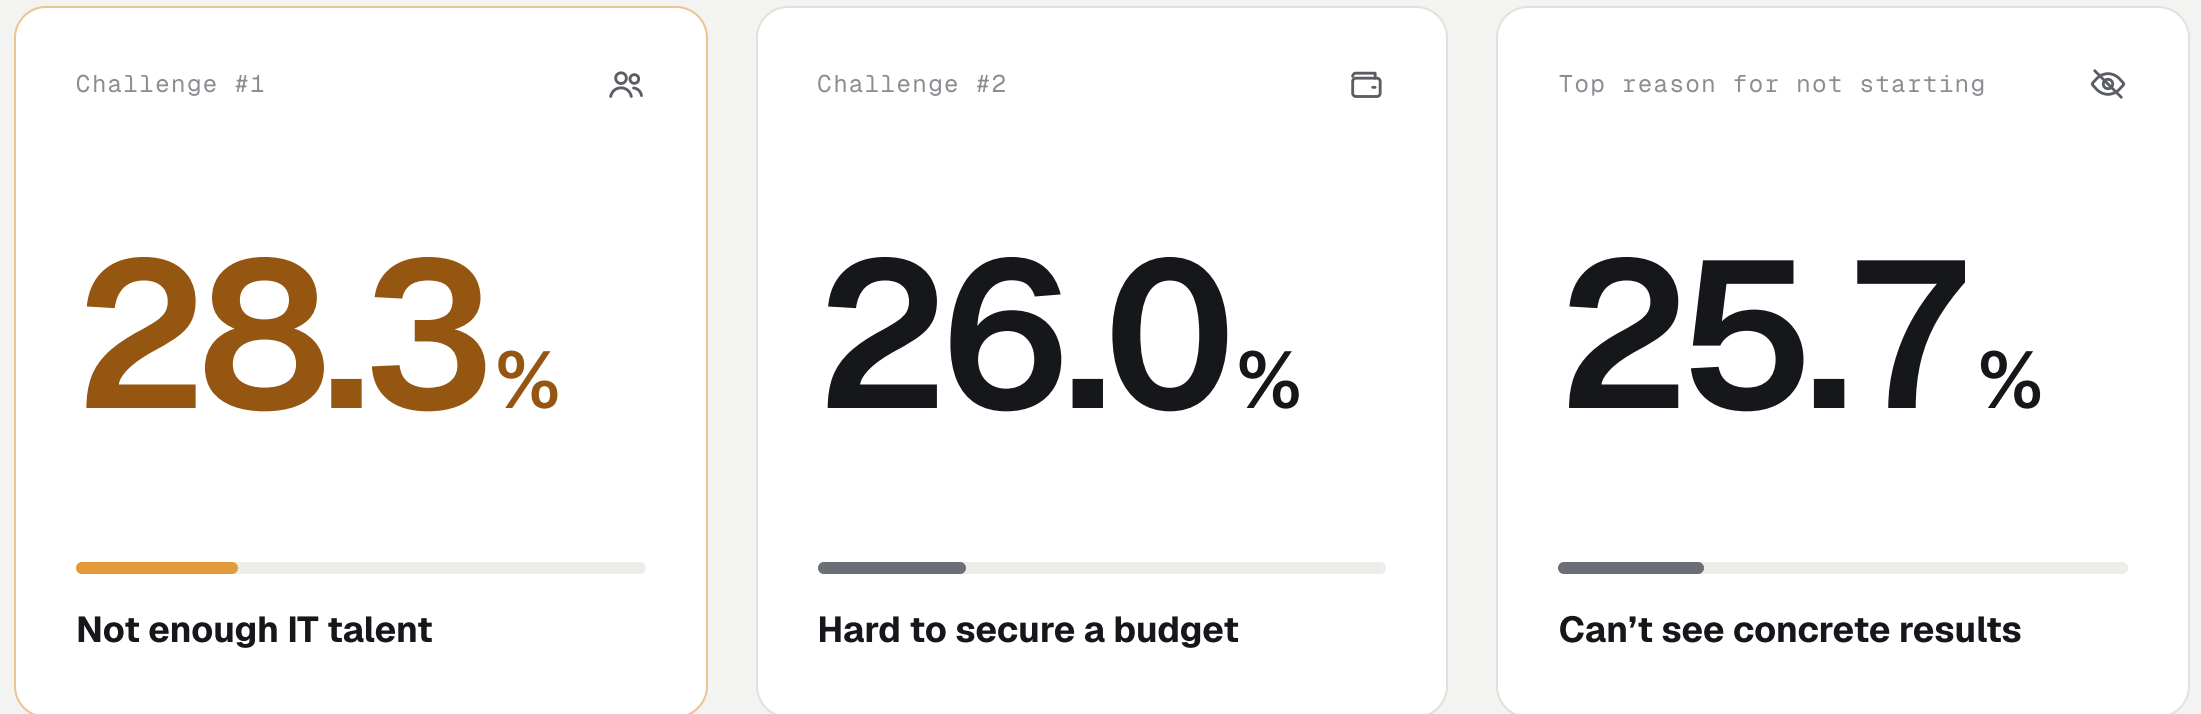

Building the intelligence layer beneath your business.

Justin K Hata

Your point of contact · Workflow diagnosis

- Inside Japan's small and mid-sized businesses

Why digital change stalls: there's no one to run IT.

Source: Organization for Small & Medium Enterprises and Regional Innovation, Japan (SMRJ), "Survey on DX in SMEs" (2025), 1,000 SMEs nationwide. Bars show the share of respondents.

- What we believe

People make the money.

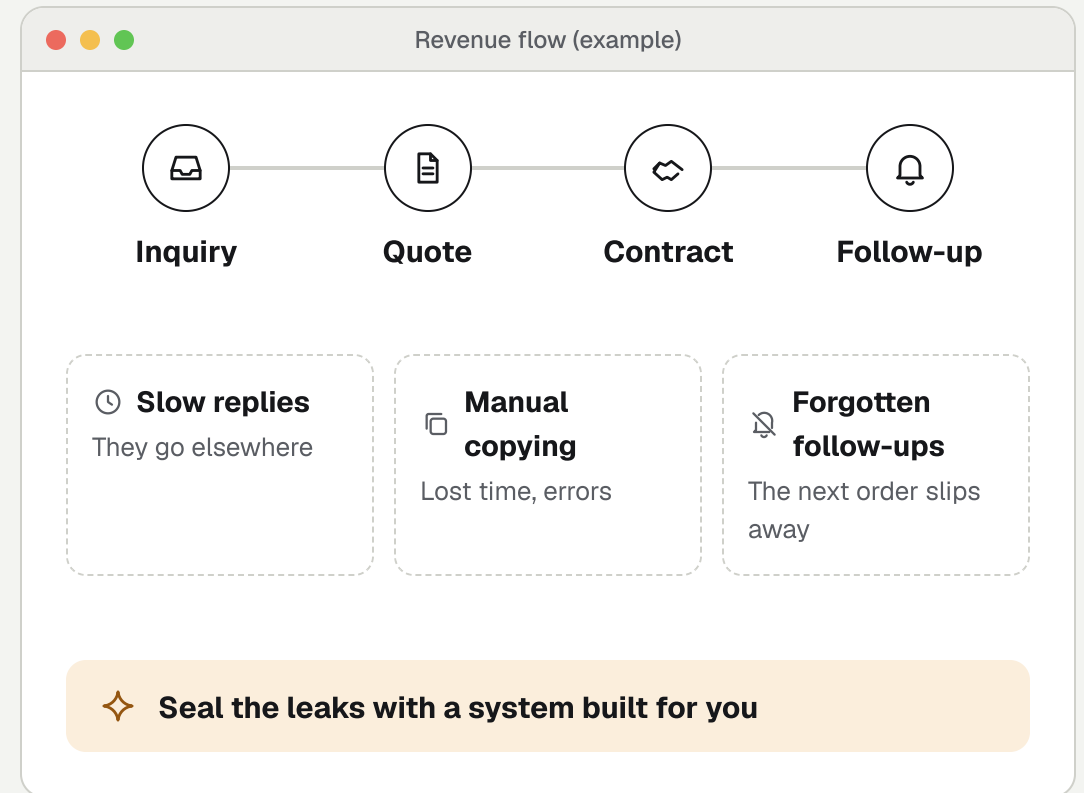

AI strengthens what already works.

Telling AI to “go make money” won’t make you any.

AI shines when it cuts the busywork and the missed chances in work that already brings in revenue.

MYCELIUM is the underground network that feeds a mushroom. We build intelligence into the unseen connections of your company — people, information and data.

- How we differ from off-the-shelf tools

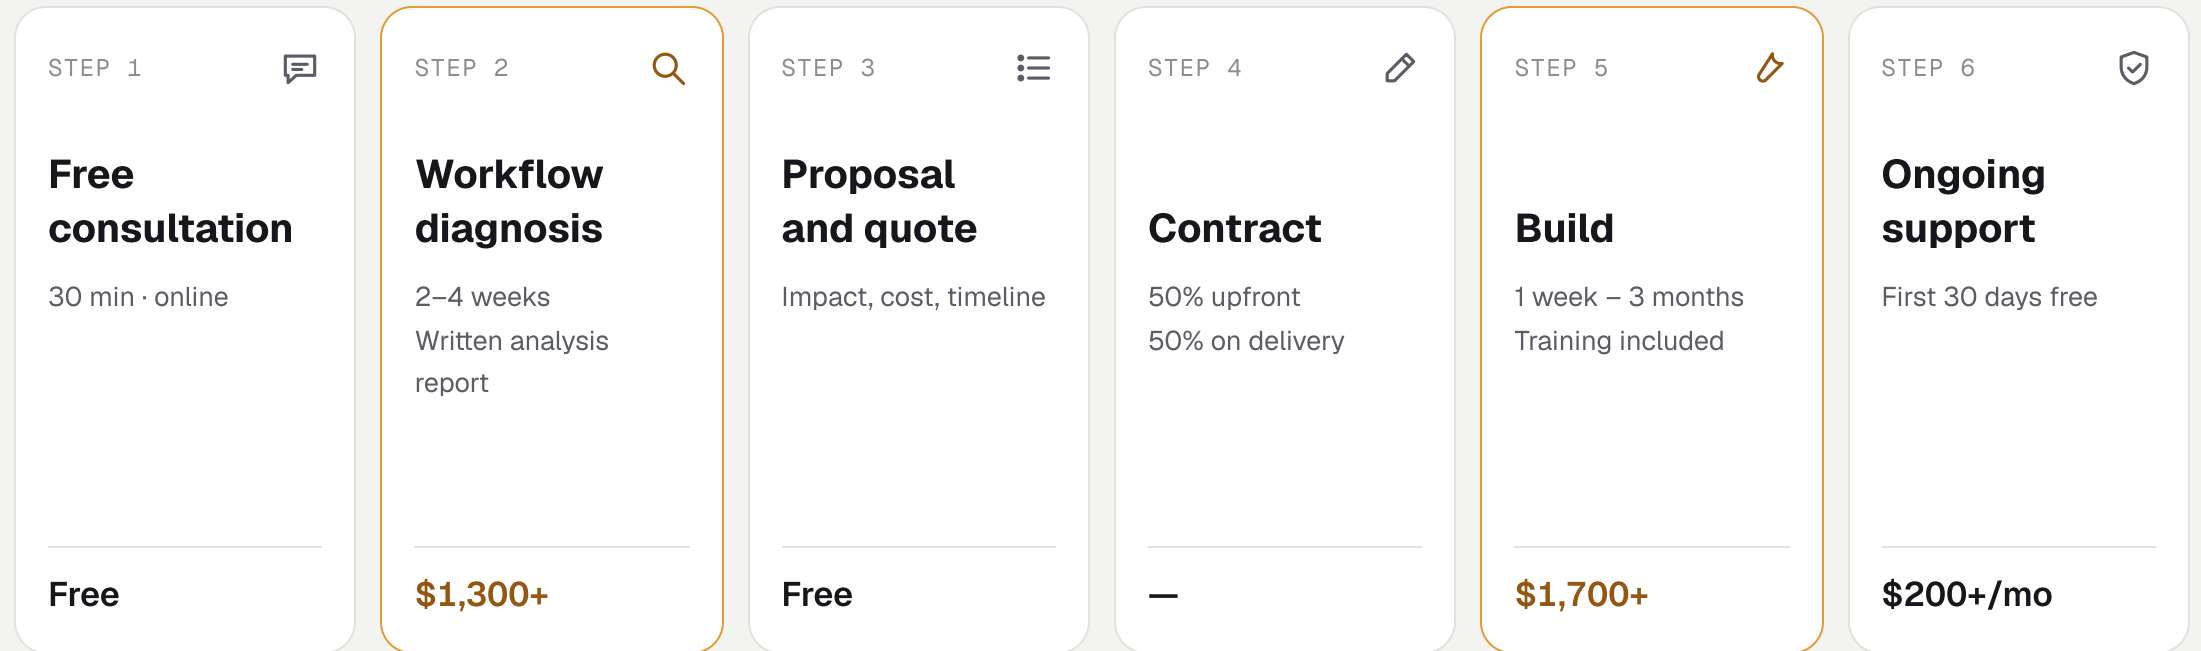

Not another tool.

A system built for your company.

Off-the-shelf tools		 MYCELIUM INTELLIGENCE
 Starts with	Signing up	✓ A person-to-person consultation
 What it takes	Motivated users with IT skills	✓ Just telling us how you work
 Impact	One person's tasks	✓ The whole company
 What you get	The same features as everyone	✓ A product made for you

● How it works

From a free consultation to a system people keep using.

✦ **You can stop after the diagnosis.** If you go ahead with the build, half the diagnosis fee is credited toward it.

● Workflow diagnosis

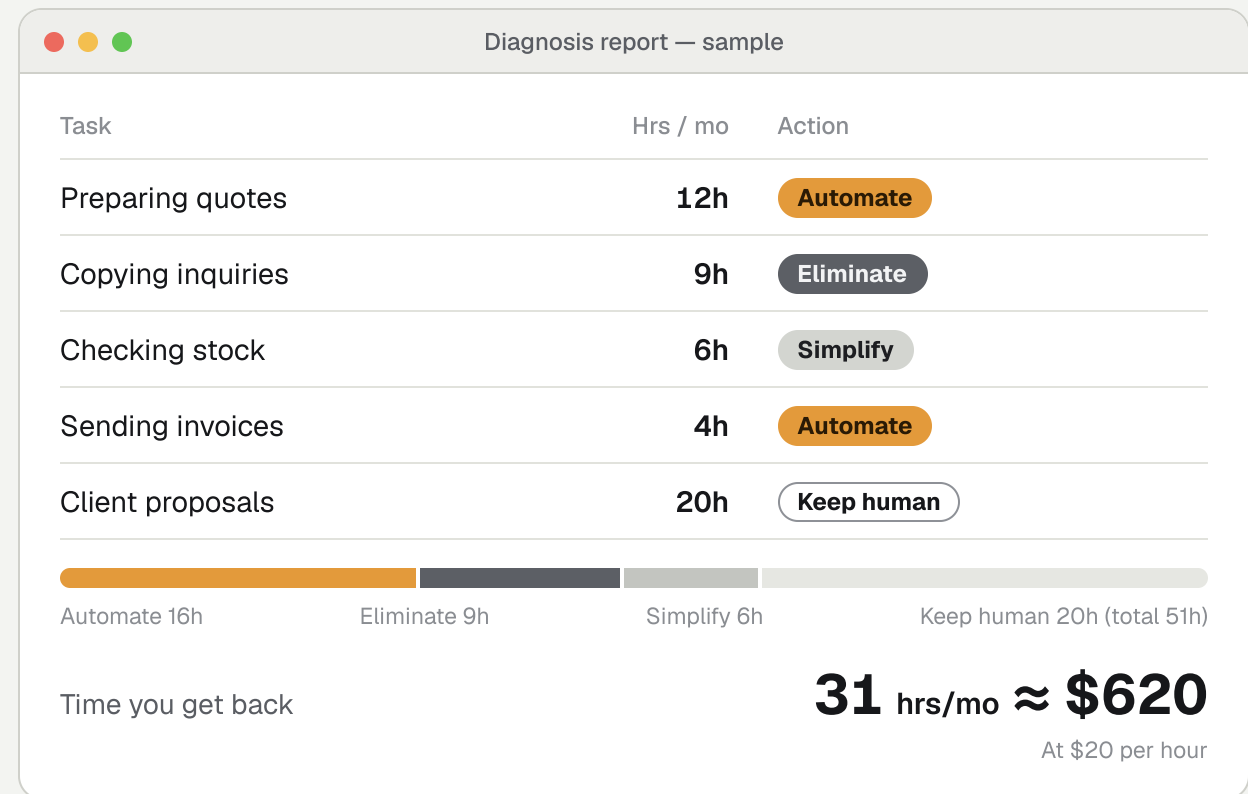

We show where time and money leak away — in numbers.

👤 Who spends how much time on what

☰ Every task sorted into four groups
Eliminate / Simplify / Automate / Keep human

💰 Time and money lost each month

🎯 A prioritized improvement plan

Small teams, working from the same page.

**Shared workspace**
Guides, records and products in one place

**A shared brain for the team's AI**
Everyone's AI works from the same context

**Account sharing**
Passwords kept safe, with a register

**Shared calendar**
One schedule across time zones

**One-on-one setup**
Mac and Windows supported

**Team onboarding session**
Everyone learns the tools and ground rules

✓ Case: a 3-person team across Japan and Cambodia (Mac + Windows)

Case Study Plan

First 3 companies

Up to 5 people · 2–3 weeks	Regularly \$3,600	\$3,000
Up to 15 people · 3–5 weeks	Regularly \$7,100	\$5,900

For companies willing to be featured as a case study after rollout, with a 30-minute interview. Naming your company is optional.

Code gathers the data. AI does the thinking.

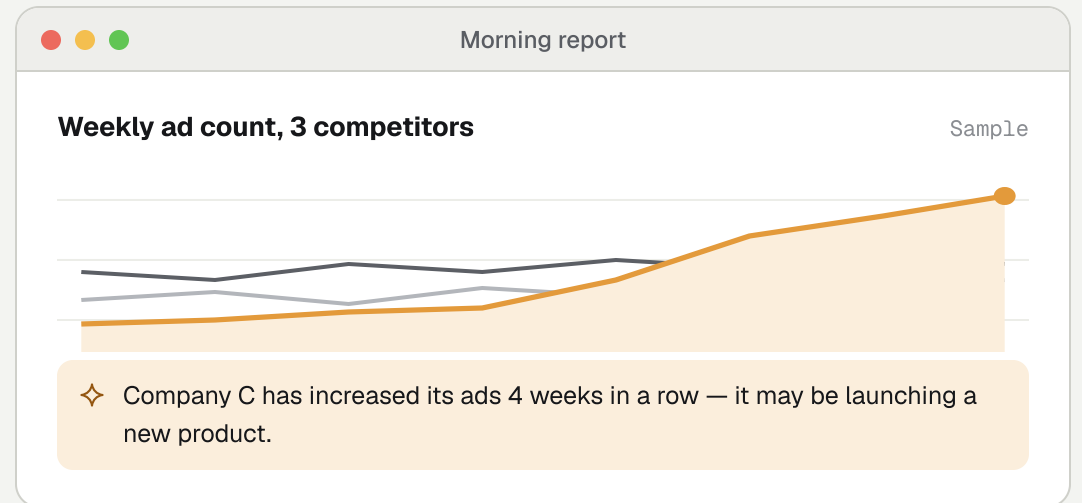

🔍 Track competitors' ads week by week

📦 Summarize e-commerce best-sellers and price trends

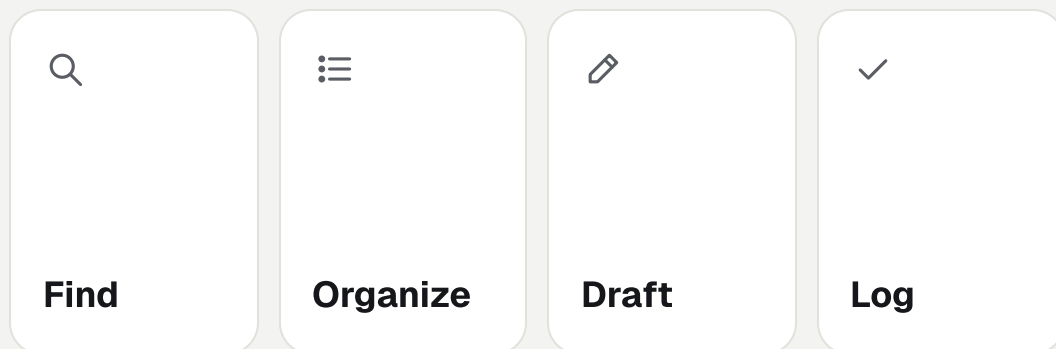

📖 Read years of posts in a field, going back in time

✓ Done: ~1,600 posts from 13 years of one account, analyzed overnight

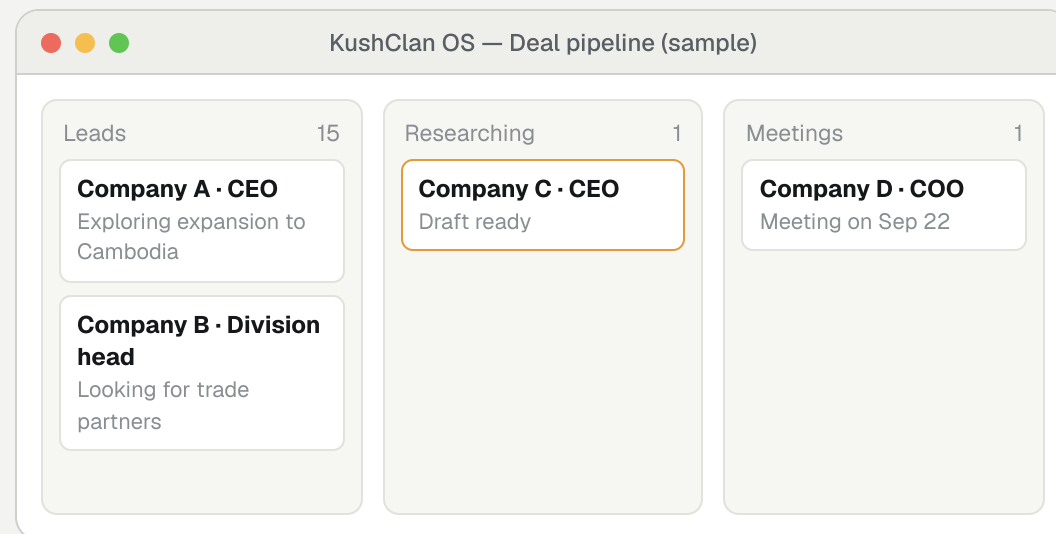

One-off research	\$1,000+
System build	\$3,300+
Ongoing operation	\$400+ /mo

Keep your sales process inside the company.

 **No automated crawling or sending.** Every action starts with a human click; AI organizes the information and writes drafts. That is how accounts keep running under LinkedIn's strict anti-automation rules.

 An outsourced sales rep in Japan costs \$3,200–4,500 a month. For 1–2 months of that, the system stays with you.

Setup	\$5,200+
Operation and improvement	\$600+ /mo

● Pricing

Diagnose, build, support. Three stages.

Through the analysis report

Lite **\$1,300**
Up to 10 people · ~2 weeks

Standard **\$3,000**
Up to 30 people · 3–4 weeks

Half the fee is credited toward the build

Build

Setup, development, training

S **\$1,700+**
A small automation

M **\$3,900+**
One end-to-end workflow

L **\$13,000+**
A small business system

Ongoing support

Monthly · 3-month minimum

Care Lite **\$200**
Health checks, bug fixes

Care Standard **\$600**
+ monthly report

Partner **\$1,000**
+ regular reviews, improvement ideas

✓ Prices in USD, excl. tax ✓ 50% upfront · 50% on delivery ✓ 30 days free after delivery ✓ 3-month support minimum

One point of contact. Built by specialists.

Justin K Hata

Point of contact · Diagnosis · Owns design and quality

- ✓ Former Quality Lead at Apple (AppleCare): led ~15 people, coached ~70
- ✓ Raised the team KPI from 78% to 85%
- ✓ Now an independent process-improvement consultant, from diagnosis to support
- ✓ Built and runs in-house tools: a sales-support app and a video localization tool

</> **Development**

Automation, apps

🧠 **Design**

UI, documents

📺 **Video**

Shooting, editing

🔊 **Paid ads**
